Description

The Type 1DX module is an ultra-small module that includes 2.4GHz WLAN and Bluetooth functionality. Based on Broadcom BCM4343W, the module provide high-efficiency RF front end circuits. The module is designed to fit into small spaces and is smaller than a dime. Minimal external circuitry is required to complete a radio design; add an antenna, power source, clocks, processor, and associated interface hardware and the radio hardware design is complete. To ease Wi-Fi certification, the Type 1DX module complies with IEEE 802.11b/g/n and Bluetooth Version 4.1 plus EDR, Power Class 1 (10dBm max) + BLE. Software is available for Linux and Android.
